Introduction

This publication contains historical data from different Unemployment Insurance (UI) programs in New Hampshire from the years 1970 through 2003. Tables and charts containing thirty-four years of data give users an insight about how UI claims, covered employment, and the unemployment compensation trust fund balance have fluctuated through various recessions and expansions of the Granite State economy.

The publication is divided into four major sections: UI Claims Information, Covered Employment & Wages, Insured Unemployment, and UI Trust Fund Information. Additionally, there are narrative sections on the Extended Benefits Programs and Glossary.

- The UI Claims Information section contains data on unemployment claims filed, benefits paid, and appeals.
- The data in the Covered Employment & Wages section comes from the Quarterly Census of Employment and Wages report, which shows the number of individuals covered by Unemployment Insurance and their wages.
- The Insured Unemployment section presents historical data on the number of insured (covered) unemployed and the insured unemployment rate.
- The financial data relates to the Unemployment Compensation Trust Fund and to the employers that are contributing to the fund.
- The information on the Extended Benefits (EB) Programs includes a narrative explanation of the Federal/State cooperative EB program and the state funded EB program. The Federal supplemental benefits programs that have been in effect over the years are listed as well.

The historical data in this publication are primarily based on administrative reports that the Economic and Labor Market Information Bureau is required to submit to the federal agency, Employment and Training Administration (ETA). The ETA uses these reports to ensure high performance, greater public accountability, service quality and customer satisfaction. Specific data sources are noted at the bottom of each of the tables.

The information in most of the tables refer to the UI program, but some of the tables also cover the unemployment insurance programs for ex-military workers and federal civilian employees, also referred to as Unemployment Compensation for Ex-military (UCX) and Unemployment Compensation for Federal Employees (UCFE).

Unemployment Insurance Claims Information

Unemployment Insurance (UI) Claims Information

The main purpose of the Unemployment Insurance (UI) program is to provide UI benefits to those individuals who become unemployed through no fault of their own and meet various eligibility requirements of New Hampshire's UI law. Once determined eligible to collect UI benefits, an individual can receive the equivalent of twenty-six (26) weeks of benefits in one *benefit year*. Over the years, several supplemental benefit programs extending the benefit period for claimants were mandated on a temporary basis. These programs are addressed in Section 5.

In order to interpret the UI claims information correctly, it is important to understand that the filing process is a two step procedure consisting of an *initial claim* and a *continued claim*. An *initial claim* is a request for determination of eligibility for UI compensation, whereas a *continued claim* or *week claimed*, is the request for financial compensation whether or not it is the first week claimed or any subsequent week claimed.

When an individual becomes unemployed, he or she can file an *initial claim* for unemployment benefits. The claim can be done over the Internet at home or at the nearest Employment Security office. With the initial claim a *base period* and a *benefit year* are established for each claimant. The total wages earned in the *base period* are used to determine the claimant's weekly benefit amount (*Monetary Determination*). In order to qualify for UI benefits the individual must have earned a certain minimum amount of wages in the base period. Since April 1, 2001, a claimant's *benefit year* is a one-year period beginning with the first day of the first week in which the individual filed an initial claim for UI benefits.

When a claimant's benefit eligibility is questioned for reasons other than reaching the minimum earnings requirement, a *Nonmonetary Determination* occurs. Reasons for nonmonetary determinations include: voluntarily quitting a job, leaving self-employment or closing one's business, being currently self-employed, being fired for misconduct connected with one's work, being unable and unavailable to accept full time work, and refusing an offer of suitable work. If the nonmonetary issue(s) affecting the claimant's eligibility for benefits is found to be valid, benefits will not be paid for those weeks. Once benefit eligibility is established, a claimant files a *continued claim* for each week that they are totally or partially unemployed.

If a claimant disagrees with any *Determination*, they have the right to appeal. Employers also have the right to appeal the benefit eligibility of their former employees if they feel the circumstances under which the former employee was separated from employment calls for denial of benefits.

An appeal hearing will be held before the New Hampshire Employment Security's Appeal Tribunal. If either party (claimant or employer) disagrees with the decision, that party can request that the Commissioner of New Hampshire Employment Security reopen the appeal. If the Commissioner does not feel that there are sufficient grounds to reopen the case, then the parties have the option of appealing to the Appellate Board.

At times it is discovered that a claimant was overpaid benefits. There are two basic categories of overpayments: fraud and nonfraud. Fraud refers to willful misrepresentation on the part of the claimant in order to receive benefits, and offenders can be prosecuted under the law. Any overpayments paid because of willful misrepresentation must be repaid to the agency. Nonfraud overpayments occur for several reasons. If the erroneous payments are the result of department error, then repayment of the benefits is not required. If the overpayment is the result of claimant error, then the money must be repaid.

Note:

Initial Claims are unemployment claims filed (1) to request a determination of entitlement for compensation or (2) to begin a second or subsequent period of unemployment within a benefit year. A new claim is the first claim filed to request a monetary claim eligibility determination. An additional claim is a notice of new unemployment filed at the beginning of a second or subsequent period of unemployment within the same benefit year. A transitional claim is filed to request a determination of eligibility and establishment of a new claim within a 7-day period after the old benefit year ended. Before April 1, 2001, New Hampshire had a uniform benefit year beginning April 1 of each year and ending March 31. After April 1, 2001 an individual benefit year is established for each claimant. Liable state claims are filed against New Hampshire employers by individuals residing in another state. The agent state is the state where the claimant files a claim against an employer in another state.

Note: Weeks claimed are claims that include both compensable and noncompensable weeks. The Agent State claims are broken out into two columns: Interstate filed from Agent State and Interstate Taken as Agent State. Interstate filed from Agent State refers to claims taken via the Interstate Internet System which began in 1983, while Interstate taken as Agent State are claims taken through the local office claims process. After 1983 all Agent State weeks claimed were supposed to come through the Internet System. However, some of these claims continued to come through the local office claims process.

Source: ETA 207 Nonmonetary Determinations report.

Note: Nonmonetary determinations are made on job separation issues such as voluntary quit and discharge for misconduct, and nonseparation issues which reflect non-job issues such as able, available, and actively seeking work, refusal of suitable work and reporting requirements. Redeterminations are decisions affirming or reversing nonmonetary determination decisions before they enter the administrative appeal stage.

Source: ETA 5159 Claims and Payment Activities report.

Note: First payments are benefit payments issued for the first compensable week in a benefit year. When comparing the number of first payments for unemployment benefits to the number of monetary determinations issued, it is important to remember that the numbers are not strictly comparable, since every individual filing an initial claim for benefits receives a monetary determination. However, not every one of those individuals will end up receiving a benefit payment due to intervening employment, the identification of nonmonetary issues related to the claim, etc.

17.8

The average duration of unemployment nearly doubled between 2000 and 2003

Source: ETA 5159 Claims and Payment Activities report.

Note: The average duration of unemployment is calculated by dividing the number of first payments issued by the number of weeks of benefits paid, including partial unemployment. Calendar year refers to the period from January of one year through December of that same year. Benefit year refers to the period from April of the previous year through March of the current year.

* In April 2001, the benefit year changed to follow the individual claimant.

Source: ETA 5130 Benefit Appeals report.

Note: Appeals may be filed by claimants or employers when there is a disagreement on a determination. Time lapse is the period between the date that the appeal was filed and the date that the decision was mailed. Lower authority refers to the first level of appeal, the Appeals Tribunal. Higher authority refers to two types of second level appeal; to the Appellate Board and to the Commissioner of Employment Security.

^{* *} Beginning with January 1997 data, the lowest breakout for Higher Authority Appeals Time Lapse is 0-45 days.

^{*} In 1983 the Appellate Board was formed, creating the "Higher Authority".

Source: ETA 227 Overpayment Detection/Recovery Activities report.

Note: Fraud is willful misrepresentation in order to receive benefits to which the claimant is not entitled. Nonfraud is an overpayment not caused by willful misrepresentation such as claimant, employer or state error, reversals, etc. Reporting was suspended as of July 1982 due to nationwide problems with report instructions and their interpretation and was resumed in October 1983 following revision of the report and its instructions by the Employment and Training Administration.

1982 data reflect only 6 months worth of activity and 1983, three months of activity due to suspension of the report, as noted in the above comment. When the report was revised and resumed in 1983 it became a quarterly report.

Source: ETA 586 Interstate Arrangement for Combining Employment and Wages report.

Note: Public law 91-373 requires every state to participate in an interstate program for combining employment and wages. The claim is reportable as a new combined wage claim at the time the claimant requests a redetermination under the combined wage arrangement. Based on this, a wage transfer is sent to another state. Intrastate refers to combined wage claims where the filing state and the paying state are the same. Interstate combined wage claims activity occurs when the filing state and the paying state are different (see next page).

INA = Information not applicable/available. The Combined Wage program began in 1972.

Covered Employment & Wages

Covered Employment and Wages

The term "covered employment and wages" refers to the employment level and wages paid by employers covered by the state's unemployment compensation laws. If any of their workers become unemployed, those workers have the option of filing for unemployment benefits. "Covered" employers either pay a quarterly tax to the unemployment compensation trust fund (called contributory employers) or they are billed each month for the actual cost of benefits paid to their employees (called reimbursable or taxable employers). Reimbursable employers include some nonprofit organizations and most state and local government entities.

Over the years there have been several law changes affecting the definition of who is to be a covered employer/employee in the state. A brief rundown of those coverage changes since 1970 follows:

- Effective January 1, 1972:
 - 1. Coverage was extended to include units employing one or more employees for 20 weeks or having a quarterly payroll of \$1,500 or more. Previously coverage was required for employers with 4 or more employees in each of 20 weeks.
 - 2. Coverage of nonprofit 501(C)(3) organizations with one or more employees in each of 20 weeks was added.*
 - 3. State hospitals became covered.
 - 4. State university system and private institutions of higher education became covered with student employees excluded.
- Effective in 1976:

Coverage was extended to all state and local government employees. Student employees of the State university system, however, were still excluded.

- Effective January 1, 1991:
 Coverage of agricultural employers who paid wages of \$20,000 or more in a calendar quarter or had 10 or more employees in 20 different weeks during the calendar quarter became effective.
- Effective July 1, 1993:
 Coverage was extended to employers who paid cash wages of \$1,000 or more in a calendar quarter to a worker who performs domestic services.

^{*} New Hampshire Unemployment law specifies what kind of nonprofit organizations are taxable.

Insured Unemployment

Insured Unemployment

The insured unemployment rate (IUR) represents the ratio of unemployed claimants to all individuals covered by the state unemployment insurance program. This differs from the published total unemployment rate,* which is based on the total labor force of the state and also does not depend on individuals filing claims. The IUR serves as a key measure of overall economic health and also as a trigger for the federal/state cooperative extended benefits (EB) program. This program is often referred to as the permanent EB program, authorized by the Federal-State Extended Benefit Unemployment Compensation Act of 1970.

The number of weeks of extended benefits payable to claimants under the EB program is generally 13 weeks, half of the entitlement under the regular UI program. The cost of these benefits is shared on a 50/50 basis between the state and federal government. A state's IUR, calculated each week, determines whether or not an extended benefit period is in effect.

The IUR is based on a 13-week moving average of the insured unemployed. In order to trigger "on" the EB program, the current weekly insured unemployment rate must be: 1) at least 5.0 percent, and 2) at least 120 percent of the average rate for the corresponding weeks in each of the two prior years. Also, extended benefit payments must not have been paid for at least 12 weeks including the current week, so that there are at least 13 weeks of nonpayment of EB before a subsequent EB period can begin. New Hampshire also uses an additional trigger method, based on the Unemployment Compensation Amendments of 1976. This alternate criterion specifies that the insured unemployment rate must be 6.0 percent or above and EB payments have not been paid for at least 12 weeks including the current week. It eliminates the 120 percent of the average rate for the two prior years' stipulation.

In addition, the State can trigger "on" the EB program when: a) the State's average seasonally adjusted total unemployment rate* for the most recent three months is equal to or exceeds 6.5 percent, and b) this rate is equal to or exceeds 110 percent of the corresponding three months in one of the two preceding calendar years.

An EB period lasts for a minimum of 13 weeks, but can also last longer. If the state continues to meet the EB trigger criteria at the end of 13 weeks, the EB remains in effect. On the other hand, if the state triggers "off" (fails to meet the above criteria) in less than 13 weeks, EB remains payable for the remaining part of the 13 weeks period.

Prior to 1981, there was also a national trigger in place. Extended benefits would become payable in all states once national qualifying criteria were met; namely that the national rate of seasonally adjusted insured unemployment equaled or exceeded 4.5 percent for 13 consecutive weeks. The program was then triggered "off" when the same rate dropped below 4.5 percent

^{*} Total unemployment rate refers to the percentage that normally is called the Unemployment Rate (UR). The insured unemployment rate differs from the more familiar total unemployment rate (UR) in a couple of ways: 1) the insured rate deals only with those individuals filing claims for unemployment compensation, whereas the total rate attempts to capture the entire unemployed labor force, and 2) the insured rate is expressed as a percentage of total *covered* employment in the state, while the total rate is a percentage of the *total civilian labor force*.

for 13 consecutive weeks. Federal law was changed in August 1981 to eliminate the national trigger. The last time New Hampshire paid cooperative federal/state extended benefits was the week ending January 24, 1981 and was a result of the national trigger.

The extended benefits program was triggered "on" in New Hampshire during the following time periods:

Triggered by:

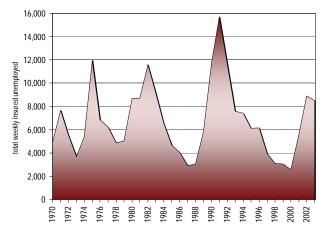

National Criteria					
"on"	"off"	weeks			
1/23/72	4/22/72	13			
2/23/75	7/23/77	125

Unemployment Insurance Trust Fund Information

Unemployment Insurance Trust Fund Information

The unemployment compensation trust fund is a national financial pool established for the purpose of paying benefits to covered unemployed workers. The fund was established by the Social Security Act. The Federal Unemployment Tax Act (FUTA), part of the Internal Revenue Code, contains the provisions for payroll taxation to finance the fund. Under the Social Security Act, all states maintain an account in the unemployment trust fund from which benefits are paid.

The unemployment compensation benefits system is funded from two major sources: contributions collected from employers and interest earned on those collections.

The amount an employer pays to the state is based on the individual earned tax rate. New Hampshire assigns tax rates to its employers based on the *reserve ratio experience* rating system. This combines the individual employers' history of contributions paid and benefits charged against an employer, and take into account the current balance of the Unemployment Compensation Trust Fund. The tax rate for a new employer in New Hampshire is 2.7 percent. In order to receive an earned or "merit" rate an employer must have one full year of experience as an employer. Since January 1994 the earned tax rate is paid on the first \$8,000 of each employee's wages.

When the Trust Fund Balance exceeds \$225 million a *fund balance reduction* is allowed to take effect. When the fund balance reduction is in effect, the employer's earned rate (for accounts with rates 2.7 percent or less) is reduced by 0.5 to 1.5 percent depending on the balance of the unemployment trust fund. On the other hand if the Trust Fund Balance falls below the \$225 million, the *fund balance reduction* disappears.

In addition to the state unemployment tax, employers must pay a federal tax billed directly to the employer through the Internal Revenue Service to cover administrative costs and the federal share of the Extended Benefits (EB) program (see section 3).

The typical New Hampshire employer has a low tax rate because they pay more into the fund than is paid out on behalf of their former employees. New Hampshire has generally not needed to increase employer tax rates across the board in order to bolster the fund. This type of an increase occurred only once, during the second quarter of 1976, due to extraordinarily high statewide unemployment.

Amendments to the Federal Unemployment Tax Act (FUTA), in 1970 and 1976 respectively, mandated that states provide unemployment insurance coverage to workers in nonprofit organizations and state and local governments. The 1976 amendment required states to allow nonprofit and governmental entities the option to reimburse the state fund for benefits paid to their employees. Employers who elect this method, called reimbursable employers, are billed monthly for actual benefits paid to their unemployed workers.

Source: ETA 2112 UI Financial Summary Transaction report.

Note: The Unemployment Insurance Trust Fund is administered by New Hampshire Employment Security. The contributions (unemployment taxes) collected from liable employers are deposited into the trust fund and unemployment benefits are paid from the fund. Interest on the monies in the trust fund is credited to the fund.

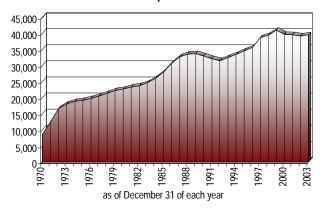

"Fund Balance" refers to the balance in the account as of December 31 of each year.

Total covered employers in New Hampshire reached its peak in 1999

Source: ETA 581 Contribution Operations report as of December 31.

Note: The contributory employers tax rate is based on their experience with unemployment insurance benefit payments. The reimbursable employer (state, local government and nonprofit organizations) repays 100% of the benefits paid to their former employees.

Information not applicable/available. Reimbursable employers are included in the count of Contributory employers prior to 1980, when revisions to the ETA 581 report required that information on Reimbursable employers be reported separately. Prior to 1976, the option of being a reimbursable employer did not exist.

Note: Total wages represent the annual payrolls of employers covered by New Hampshire unemployment insurance laws.

Taxable wages are that portion of the total wages on which employers pay taxes. The amount of taxes employers pay per employee is limited to the taxable wage base for the year.

Source: ES 204 Experience Rating Report and ET Handbook 394.

Tax rates vary from one employer to another depending on the amount of unemployment experienced. When a tax rate is multiplied by taxable wages, it provides the contributions due to the unemployment trust fund from each employing Note:

These rates include any fund balance reductions that were in effect during any particular calendar quarter. Fund balance reductions are applied to each employer with a tax rate of 2.7% or less. The schedule for fund balance reductions (effective July 1, 1999), is as follows:

- 0.5 percentage point reduction if U.I.T.F balance = or exceeds \$225,000,000
 1.0 percentage point reduction if U.I.T.F balance = or exceeds \$250,000,000
 1.5 percentage point reduction if U.I.T.F balance = or exceeds \$275,000,000

Source: ETA 204 Experience Rating report. The information in this table is classified according to the calendar year of the ETA 204 report, and reflects the rate year beginning July 1 of the report year and ending June 30 of the following year.

Note: The ERI is the percentage of total benefits paid that are charged back to the "responsible" employer. The difference between the ERI and 100% indicates the percentage of benefit payments that a state has spread to all employers. The ERI is calculated as the difference between active employer charges and ineffective charges, divided by total benefits. Total benefits are active employer benefit charges plus noncharged benefits which are not charged to specific employers for various reasons such as misconduct or voluntary quit.

In 1988 the level of Noncharged benefits showed a significant increase due to an extraordinarily large amount of benefits noncharged to employer accounts as a result of wage combining arrangements with other states.

In 2000 and the three following years the level of Noncharged benefits increased even more dramatically than in 1988. This time the increase was due to expenses related to training of employees that were separated from a Certified Trade Act employer. In addition, the 2003 Noncharged number also conceals the state sponsored Additional Benefit program (see State Programs page 48 in Section 5 – Extended Benefits Programs).

Extended Benefits Programs

Extended Benefits programs

In New Hampshire, there have been two major types of extended benefit programs in effect over the years: the federal/state cooperative extended benefit (EB) program and various federal supplemental benefit programs. Some states go a step further and have some form of state-financed extended benefits program provision in their UI law. New Hampshire inserted such provision for the first time in July 2003 called Additional Benefits.

The federal/state cooperative extended benefit (EB) program extends the benefit period by 13 weeks for the unemployed who have exhausted their regular benefits and meet the qualifying criteria. In order to qualify and continue to be eligible for extended benefits, claimants must participate in extra efforts to find employment, such as meeting more extensive work search requirements, while continuing to meet the eligibility criteria of the regular UI program. The federal/state cooperative extended benefit (EB) program is discussed in further detail under Section 3.

Federal Supplemental Programs

Over the last three decades several temporary federal programs have been in effect in the nation as well as in New Hampshire. The purpose of these federal funded programs was the provision of additional weeks of unemployment benefits during periods of high unemployment when the federal/state cooperative extended benefit (EB) program was not in effect.* Because these programs were all financed 100 percent by the federal government, the state trust funds gained additional resources during tough economic times.

Special Unemployment Assistance (SUA)

The first federal supplemental program was the Special Unemployment Assistance (SUA) program. It became effective in December 1974 and provided 26 weeks of benefits to unemployed individuals who had no rights to compensation under the established unemployment laws or to any assistance or allowances with regard to unemployment under other federal laws. The program ended in New Hampshire in December 1977, with claimants remaining payable until March 1978.

Federal Supplemental Benefit/Compensation (FSB and FSC)

Operating within the same time frame as the SUA program was the Federal Supplemental Benefit (FSB) program. Effective in June 1975, it provided approximately 10 additional weeks of benefits to those individuals exhausting all entitlement to UI under any other program. The program officially ended in March 1977, with claimants payable into 1978.

The FSB program returned, slightly amended and with a new name, in October 1982. The revised program was the Federal Supplemental Compensation (FSC) program. It was designed to provide, in New Hampshire, six additional weeks of benefits to those claimants exhausting all entitlement to unemployment compensation under any other program. The program was terminated in April 1985.

^{*} Historic information of when the federal/state cooperative extended benefit (EB) program was in effect in New Hampshire is listed in Section 3.

Emergency Unemployment Compensation (EUC)

In November 1991 the Emergency Unemployment Compensation (EUC) program was authorized. This program was extended by emergency legislation four times until it finally ended in April 1994. The following are descriptions of the various versions of the EUC program:

- EUC-1: Effective November 1, 1991, this program provided 13 additional weeks of benefits to those who exhausted their regular UI benefits. The program was slated to end with the week ending July 4, 1992.
- EUC-2: Effective February 7, 1992, it extended the EUC program and again provided an additional 13 weeks of benefits.
- EUC-3: Effective July 3, 1992, it allowed claimants filing for regular UI to receive an additional 20 weeks of benefits. The eligible claimant was given the option to receive EUC based on an earlier benefit year (and hence an earlier base period in which they may have had higher earnings enabling them to qualify for a higher weekly benefit amount), the current benefit year, or to file for regular UI instead. However, claimants already receiving EUC benefits were not eligible for this extension.
- EUC-4: Effective March 6, 1993, it allowed those claimants who exhausted regular state UI benefits after March 6, 1993 to receive 20 weeks of EUC benefits. It did not provide additional weeks for individuals who had already exhausted their EUC claims. This particular version was due to end October 2, 1993, with claimants continuing to be payable until January 15, 1994.
- EUC-5: Effective November 24, 1993, retroactive to October 3, 1993, this final version of the program allowed 7 weeks of EUC benefits to anyone who exhausted regular UI from October 2, 1993, through January 29, 1994. The termination date for this version was April 30, 1994.

From its inception in November 1991 until its conclusion on April 30, 1994, claims paid to New Hampshire claimants under the EUC program totaled \$52,539,935.

Temporary Extended Unemployment Compensation (TEUC)

In March 2002 the Temporary Extended Unemployment Compensation Act was signed into effect. The program was designed to extend the benefit time period available to workers who had exhausted their 26-week regular unemployment compensation period. The initial phase provided up to 13 weeks of federally funded benefits to all states. An additional 13 weeks of benefits was allotted to states that were in an extended benefits (EB) period. As New Hampshire had not been in an EB period since 1981, the state was not eligible for the second 13 week TEUC compensation period.

Claimants were eligible for TEUC payments if they filed an initial claim during or after the week of March 15, 2001. They had to have exhausted their regular benefits and have no benefit rights under any state, federal or Canadian law. To qualify for TEUC payments, individuals must have had 20 weeks of work or the equivalent in wages, in their base periods. Benefits payment under the initial TEUC Act ended December 28, 2002, but several additional amendments extended this program.

January 8, 2003, the President amended the TEUC Act, enabling individuals that already had established eligibility to continue to receive TEUC payments. The amendment also provided a phase-out for each individual claimant who had any remaining amount as of May 31, 2003.

April 16, 2003 the President authorized special rules for TEUC eligibility. These special rules made certain displaced airline and related workers eligible for up to 39 weeks of basic TEUC (henceforth "TEUC-A") if they were separated from a qualifying employer on or after September 11, 2001. Payment under this provision had to be claimed no later than the end of December 2004.

The President signed a second extension of the TEUC Act of 2002 on May 28, 2003. This extended the basic program through December 31, 2003, and extended the period for payments of remaining amounts through March 31, 2004.

State Program - Additional Benefits

The state decided to provide Additional Benefits to a claimant who after May 31, 2002 exhausted benefits under the TEUC Act of 2002. The state could solely use funds received from the federal Reed Act distribution in January 2002 to finance this program. Claimants were eligible to collect up to 13 additional weeks of benefit until the week ending December 28, 2003.

Special Assistance programs

There are a few additional special programs in place that extend the period in which certain claimants can collect UI benefits and provide additional resources to training and reemployment services. These programs include the Trade Readjustment Assistance (TRA) and the Disaster Unemployment Assistance (DUA). The TRA program provides compensation, training, and reemployment services to those individuals who lost their jobs due to the adverse effect of foreign imports. The DUA program provides compensation to those individuals whose unemployment was caused by a natural disaster, when declared by the Federal Emergency Management Agency (FEMA).

Active Charges

Benefit charges to active employer accounts.

Additional Claim

See Initial Claim.

Agent State

The state in which a claimant files an interstate claim for compensation against another (liable) state where wages were earned. For example, if a New Hampshire resident files a claim against an employer in Massachusetts, New Hampshire would be the agent state and Massachusetts would be the liable state.

Average Annual Wages

Total wages in covered employment divided by average monthly covered employment.

Average Monthly Covered Employment

The sum of all reported covered employment for a 12-month period divided by 12.

Average Weekly Benefit Amount

The total benefits paid for all weeks of unemployment divided by the number of weeks compensated. The average WBA is calculated using weeks of total unemployment only.

Average Weekly Wage

Average annual wage in covered employment divided by 52.

Base Period

The first four (4) of the last five (5) completed calendar quarters immediately preceding the initial claim. If an individual can not establish a The number of weeks for which payments benefit rate using this method, an alternate base period method will be used.

Benefits

Cash payments to an individual under the New Hampshire Unemployment Compensation laws (RSA 282).

Benefit Year

The 52-week period following the claimant's initial claim.

Claimant

An individual who has filed a request for determination of benefit eligibility.

Continued Week Claimed

A request for payment of benefits for a week of unemployment after the week has occurred. A claimant cannot file for a week of unemployment until that week has passed.

Combined Wages

(Interstate Wage Combining)

Wages paid during a base period that were earned in more than one state and combined for the purpose of determining benefit eligibility and each state's share of liability for these benefits.

Covered Employer

An employing unit that is subject to the state's unemployment compensation laws.

Covered Employment

The number of jobs covered by unemployment insurance.

Duration

were received (actual) or qualified for (potential) by an individual. Average duration is defined as the number of weeks paid in a 12month period divided by the number of first payments issued during that same period.

Effective Charges

Benefits charged to positive and negative balance employers up to the level of their tax contributions.

Exhaustees

Persons who have received all payments for which they were determined eligible during the (1) A new claim for unemployment benefits benefit year.

Experience Rating

New Hampshire uses a method of measuring an employer's experience with unemployment, ranking each employer by reserve ratio (cumulative contributions minus cumulative benefits) and then ordered relative to each employer.

Extended Benefits (EB)

Additional benefits available to claimants after the regular 26 weeks of state unemployment insurance benefits have been exhausted, when conditions for an extended benefit period have state trust funds and 50% from federal trust funds.

Final Payment

The last benefit payment of a specific program to which an individual is determined entitled during the benefit year. (See Exhaustees)

First Payment

The payment for the first week of benefits claimed to which the claimant is entitled under a specific program.

Inactive Charges

Benefit charges to inactive or terminated employer accounts.

Ineffective Charges

Portion of the employer's benefit charges that cannot increase the employer's rate as already at the highest tax rate allowed.

Initial Claim

- filed to request a determination of entitlement to and eligibility for compensation, or
- (2) An additional claim filed at the beginning of a second or subsequent period of eligibility within a benefit year. This happens after a break of one or more weeks has occurred in an individual's claims series because of intervening employment, or
- (3) A transitional claim filed for the first week in a new benefit year if the claimant also filed for the last week in the previous benefit year.

Insured Unemployment

been met. This program is financed 50% from The number of persons covered by unemployment insurance, during a given week, filing continued claims for full or partial regular benefits.

Insured Unemployment Rate (IUR)

Ratio of insured unemployed to average covered employment; computed as average insured unemployment over a 13-week period divided by average covered employment lagged 6 months.

Interstate Claims, Interstate Payments (Liable State)

Claims made by, or payments made to, persons residing in other states who worked in New Hampshire and for which New Hampshire is totally or partially liable for unemployment compensation payments.

Interstate Claims (Agent state)

Claims made by persons residing in New Hampshire against employers in other state(s) for which other state(s) will be totally or partially liable for unemployment compensation payments.

Intrastate Claims, Intrastate Payments

Claims made by, or payments made to, persons residing within New Hampshire against New Hampshire employers.

Liable State

See Interstate Claims.

Local Office

The thirteen New Hampshire Unemployment Insurance claims centers which take and process claims and provide employment services.

Multiclaimant

A situation in which a group of claimants file an appeal case. A single hearing is held with the decision binding on all members of the group.

New Claim

See Initial Claim.

Noncharges

Benefits not charged to employer accounts due Total Civilian Labor Force to specific exemption by state law or agency procedure. Noncharges may include disqualifications, overpayments, combined wage claims, and state share of extended benefits.

Regular Benefits

See State UI (Regular) Program.

Reimbursable

A contribution system whereby certain employers (state and local governments, hospitals, schools, nonprofit corporations) can elect to directly reimburse the state unemployment compensation trust fund for benefits paid that they are responsible for, rather than pay taxes under the experience rating system.

Standard Industrial Classification (SIC)

A national standardized system that classified reporting employing units into industries by 4digit codes, according to primary economic activity. This classification system was used until 2001, although for claims purposes SIC was also used in 2002 and 2003.

State (II (Regular) Program

An insurance program designed to provide compensation to those who are temporarily involuntarily unemployed, funded through employer taxes and reimbursements. The maximum period an individual can receive regular UI is 26 weeks in one benefit year.

Taxable Wage Base

The maximum amount of an employee's wages subject to state unemployment insurance taxes. Each state sets what the amount of taxable wages will be.

All noninstitutionalized persons age 16 and over residing in a specific geographical area who are either employed, unemployed and seeking employment, or involved in a labor dispute.

Total Unemployment

All residents age 16 and over who did not work during the relevant period, but were available and seeking work or waiting to report ited by state agencies to the credit of their to work within 30 days. This definition also refers to a person that has been 100 percent unemployed for an entire week, in the sense that the person had no earnings for that week.

Total Unemployment Rate

The ratio of unemployed residents to the total civilian labor force; defined as total unemployment divided by the total labor force.

Total Wages

The total of all gross wages paid by covered employers including commissions, bonuses, tips and other payment in kind e.g. room and meals.

Transitional Claim

See Initial Claim.

Trust Fund Reserve

Funds on deposit in the trust fund plus balances in the state's "clearing account" and "benefit payment account", plus interest credited for the last quarter of the calendar year.

UCFE:

Unemployment Compensation for Federal Employees

UCX:

Unemployment Compensation for Ex-military

ID

Unemployment Insurance

Unemployment Trust Fund

A fund established in the Treasury of the United States which contains all monies deposunemployment fund accounts and federal unemployment taxes collected by the Internal Revenue Service.

Weekly Benefit Amount

The weekly amount payable to a claimant for a compensable week of total unemployment as determined by their annual earnings in the base period.

Weeks Claimed

The number of weeks for which the claimants requested financial compensation. Not all weeks, however, are being compensated. Interstate claims are counted in the state of residence (agent state).

Weeks Compensated

The number of weeks claimed for which UI benefits are paid. Interstate claims are counted in the liable state.
